

ENTRY 46

Best Curved Stairway - Modern

Aesthetic Value:

This graceful curve stair is the perfect addition to an amazing beach house.

Stair Safety:

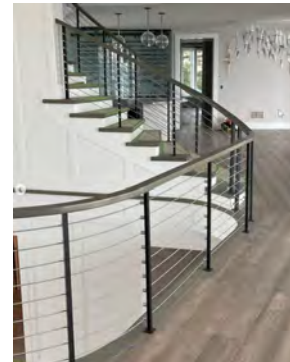

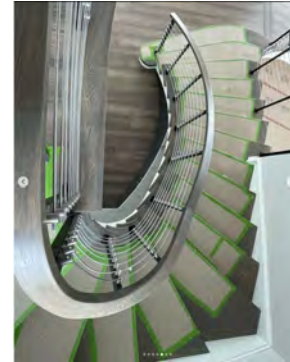

Entry has met the codes as enforced in local jurisdiction.

Quality of Workmanship:

Solid 2" White Oak treads, pre-finished in-house to match hardwood flooring, adds a higher level of quality.

Technical Challenge:

This stair was designed with multiple radius curves put into a square corner. Final curve is 180°

NOTE: Entry met the code as enforced in the local jurisdiction.

ENTRY 47

Best Curved
Stairway -
Modern**Aesthetic Value:**

Our minimalist floating curved stair anchors the central point of their home. The customer was overjoyed at the outcome and told us it was the most beautiful art piece in their home.

Stair Safety:

Our wire chased lighting creates greater illumination for egress users. All of the local codes were adhered to.

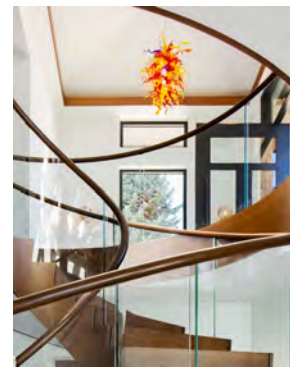

Quality of Workmanship:

All of the risers were angled back and lock mitered to the treads for a modern blunt edge reveal. All the helical glass was knifed into the sawtooth stair stringers with wire chased trough lites.

Technical Challenge:

Laying out the stair geometry when several radius points were required in order to avoid nearby column while still maintaining smooth pitch changes in the rails and stringers.

NOTE: Entry met the code as enforced in the local jurisdiction.

ENTRY 48

Best Curved Stairway - Modern

Aesthetic Value:

Fills the room nicely.
Incorporated room for a baby grand piano off the front.

Stair Safety:

Dual grab rails, Intermediate landing

Quality of Workmanship:

White oak treads and rail with painted curbing

Technical Challenge:

Incorporating an intermediate landing and tying in all wainscot panels

ENTRY 49

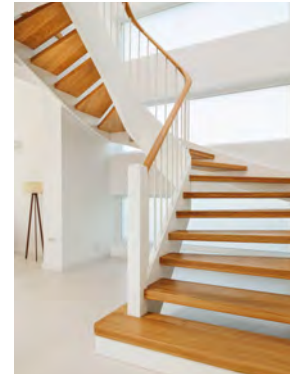

Best Curved Stairway - Modern

Aesthetic Value:
With a fresh look the stair gives elegance and a distinctive note to the entire space

Stair Safety:
The stair follows all local regulations

Quality of Workmanship:
Premium oak for treads and handrail, premium beech wood for strings and structural elements. we love to call our projects as PREMIUM and this for a good reason

Technical Challenge:
A heavy structure, with 60mm strings and treads, with preassmled curve string...a real challange, from manufacturing to instalation

NOTE: Entry met the code as enforced in the local jurisdiction.
